

Texas Instruments:

Building the next era of semiconductor manufacturing in Sherman, Texas

Building manufacturing capacity

- **\$30 billion** investment
- **Four 300-millimeter** fabs, larger than **24 football fields**
- Up to **3,000** TI jobs
- **First production** expected in 2025
- **Largest** private sector economic investment in Texas history

Building advanced manufacturing

- **100x** cleaner than an operating room
- **15 miles** of automated track to move wafers
- **Tens of millions** of analog and embedded processing chips made daily, used in electronics everywhere

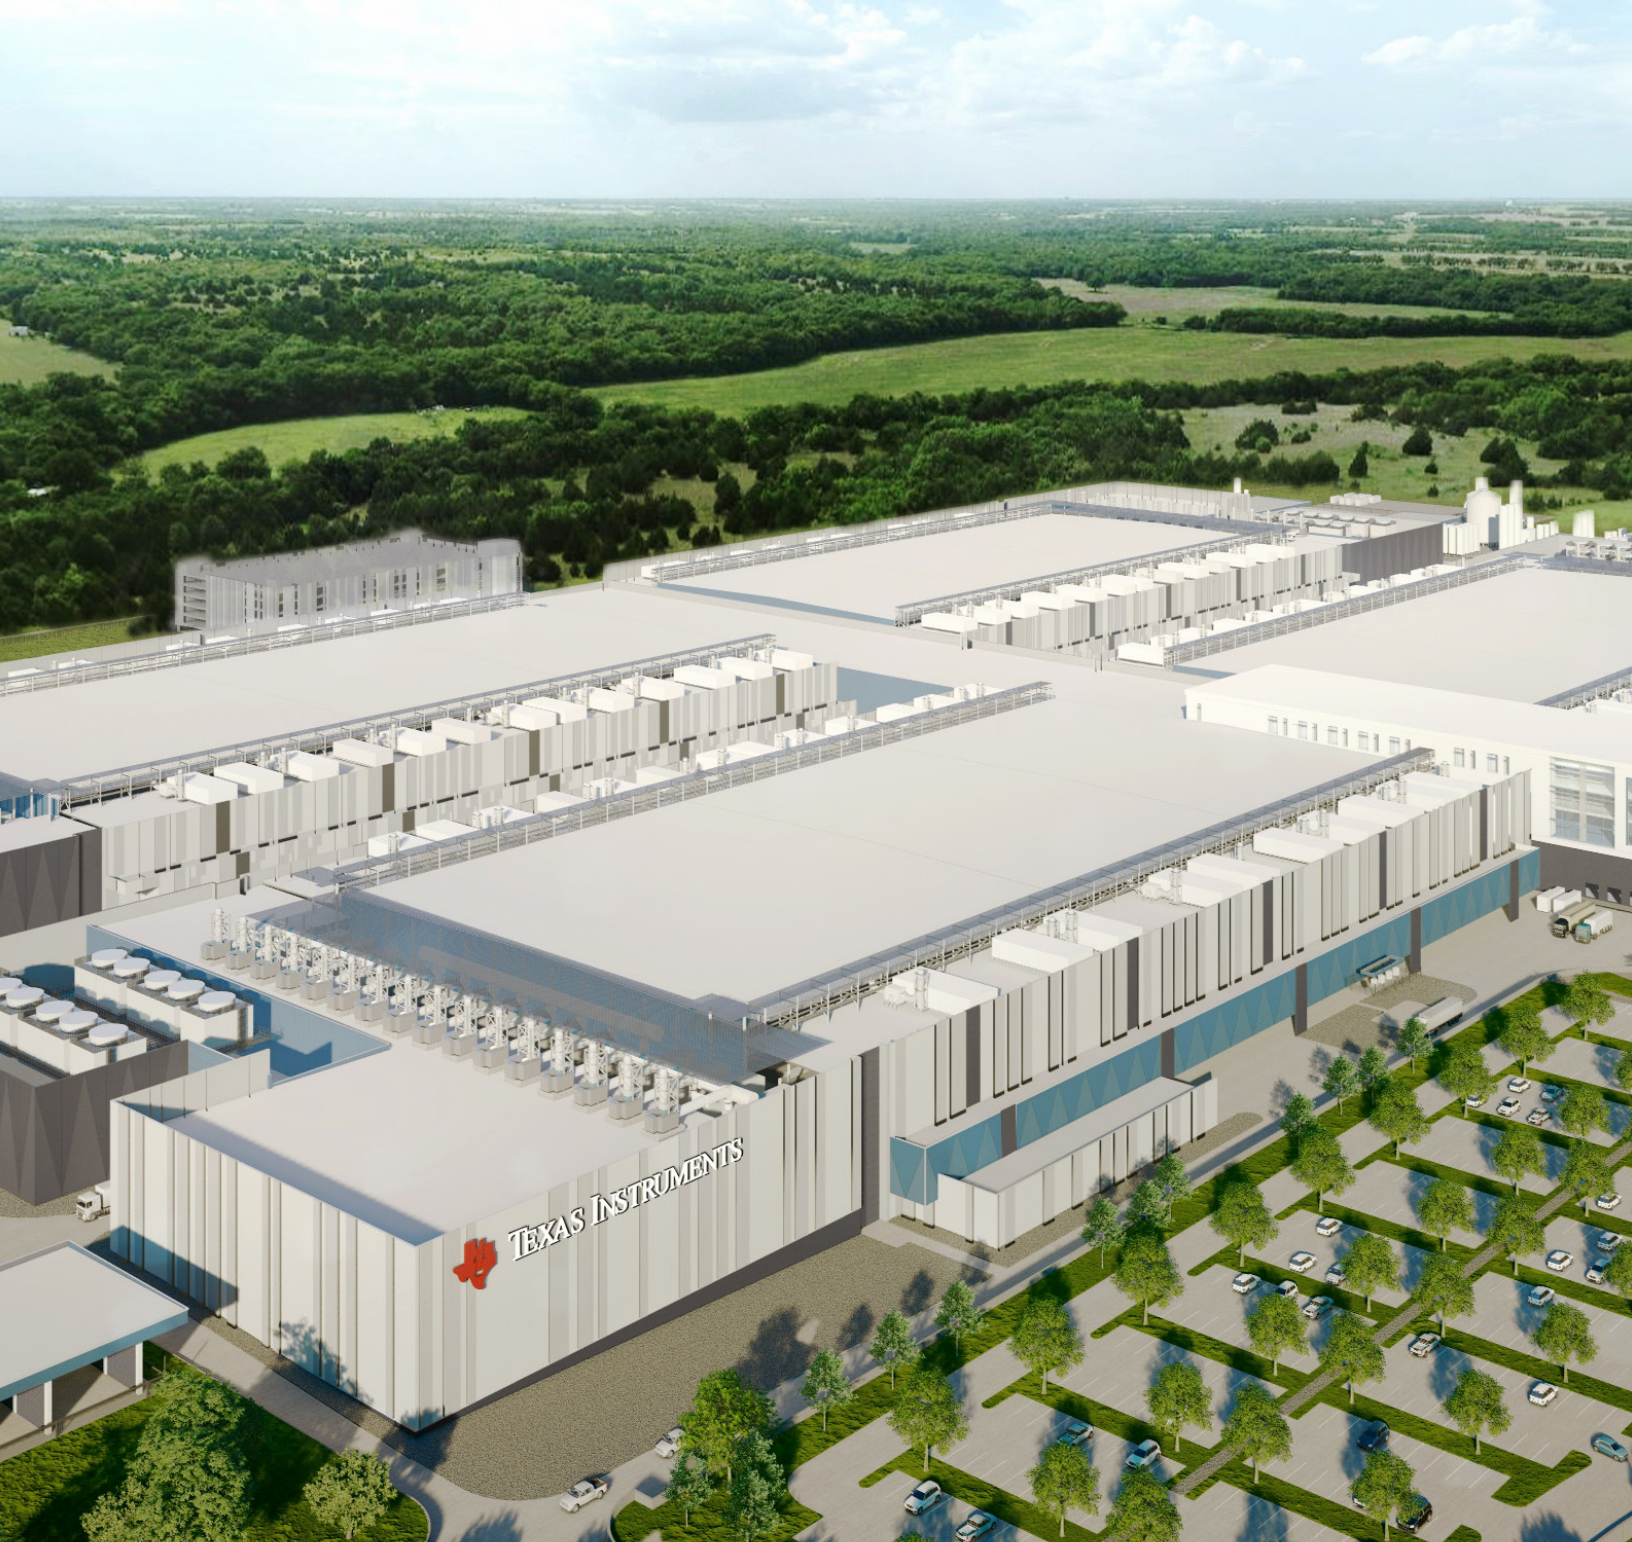

Building a sustainable future

- Designed to meet **LEED Gold standards**
- Advanced equipment **reduces waste, water and energy** consumption

Building strong communities

- **90+** years in North Texas
- In Sherman since **1966**
- **Hundreds of millions of dollars** invested in North Texas communities since 2010

Design concept for new 300-millimeter semiconductor wafer fabs in Sherman, Texas
